Tap Into Better Dining

Transform your restaurant with QR menus, digital ordering, and real-time kitchen management — no app download required.

THETABLELYNK.COM

THE PROBLEM

Restaurant Operations Are Changing

Guest expectations have moved on. The tools most restaurants run on haven't. The result is friction at every table — and margin left on it.

Printed menus are costly & rigid

Every price change, new dish, or sold-out item means a reprint — and outdated menus on the table.

Staff spend hours taking orders

Manual order-taking ties up your team during the rush — slowing service and turning tables more slowly.

Order mistakes cost goodwill

Mis-heard orders mean remakes, refunds, and a guest who won't come back.

Zero visibility into the business

No data on best-sellers, peak hours, or average spend — so every decision is a guess.

Guests expect digital, now

Diners want to scan, browse photos, customise, and pay from their phone — instantly.

THE SOLUTION

Meet TheTableLynk

One complete QR-ordering platform. Guests scan, browse, order and pay — straight from the table. Your kitchen and front-of-house stay perfectly in sync.

1

Scan QR Code

At the table — no app, no sign-up.

2

Browse the Menu

Photos, descriptions, variants & add-ons.

3

Place the Order

Customised, accurate, sent in seconds.

4

Kitchen Receives It

Live ticket on the kitchen display.

5

Serve the Guest

Faster service, happier tables.

No app. No friction.

It runs entirely in the browser. The QR opens the menu instantly — every guest, every device.

FOR YOUR GUESTS

A Better Dining Experience

From the first scan to the final tap, every moment feels effortless and on-brand — the kind of polish guests remember.

✓ Instant QR access — open in one scan

✓ Zero app download or sign-up

✓ Beautiful, branded digital menu

✓ Rich food photos & descriptions

✓ Variants & add-ons (Half / Full, extras)

✓ Faster, self-paced ordering

✓ Seamless UPI payment at the table

✓ Live order tracking to the table

Built for Modern Restaurants

Everything you need to run service end-to-end — in one elegant system.

Digital Menu Management

Update items, prices & photos instantly.

QR Table Ordering

A unique QR per table, order to the seat.

Kitchen Display System

Live tickets with time escalation.

Order Management

Every order, status & payment in one view.

Analytics & Insights

Revenue, best-sellers & peak hours.

Table & QR Management

Add tables, print & download QR sheets.

Payment Integration — UPI (GPay, PhonePe, Paytm), counter & more, settled at the table.

Control Everything From One Dashboard

Run the whole floor from a single, beautiful screen — on a laptop, tablet, or the kitchen TV.

✓ Real-time orders

✓ Revenue tracking

✓ Instant menu updates

✓ QR code management

✓ Customer activity

✓ Performance analytics

Make Better Business Decisions

Every scan and order becomes insight. Know what sells, when you're busy, and where revenue is hiding — then act on it.
